

## CS Gold Version 6: The New Gold Standard

- Oracle 11g support
- Windows 2008 support
- Email or text cardholder notifications
- Enhanced search feature
- IT security enhancements

## For Colleges and Universities

### Introduction

CS Gold® is a powerful, modular campus card system that integrates seemingly disparate auxiliary services with ease. The flexible technology allows cardholders at universities around the world to identify themselves, make purchases on campus and off, utilize meal plans and activity rights, access facilities, manage accounts, keep informed of university happenings, and much more.

The latest release of CS Gold, version 6, offers universities even more value with enhanced data security, improved search functions, targeted cardholder communications, support for the latest technologies, and much more. Add these to the solution's existing features and CBORD's industry-leading support and consulting, and CS Gold sets a new gold standard for campus technologies.

### System Design

CS Gold is designed to work within each university's operational environment to provide user-friendly management, reporting, and administration. The system is compatible with the industry-standard Microsoft® Windows® 2008 operating system, Oracle® 11g database, and the latest 64-bit technology to keep campuses ready for the future. Intuitive GUIs make monitoring, tracking, and responding to events fast and efficient, whether using a fully integrated, multi-site system or single device control.

Switching credentials? Not to worry. CS Gold supports a wide variety of ID form factors including magnetic stripe, proximity, iCLASS®, biometrics, and more. From campus-wide enterprise management to stand-alone badging systems, CBORD® systems offer a solution for universities of every shape and size.

### Modular Setup

CS Gold's modular architecture makes it easy to implement features one at a time, in phases, or all at once, depending on campus needs. The advanced, scalable architecture will grow with you.

**Card Production:** Datacard® IDWorks® is fully integrated into the CS Gold GUI, providing a seamless card production experience from a single interface—CS CardLink™.

**Access Control:** CS Access™ is designed for the campus environment. Administrators can assign access privileges and monitor alarm points quickly and easily, including locations such as doors, turnstiles, parking gates, elevators, and more. Powerful Squadron® control panels offer the ultimate in both flexibility and security.

**Meal Plans:** Meal plan cost accounting, scheduling, proration, and dispensation are made easy with CS Meal Plans™. Multiple plans are supported for each patron, and each meal can have an unlimited number of periods. Whether using standard plans or equivalencies, the system lets you tailor the setup to your operation.

**Stored Value & Credit:** CS Stored Value & Credit™ allows for user-defined debit/credit plans commonly used for vending, bookstores, libraries, copiers, dining services, network printing, and off-campus purchases. In addition to a host of configurable criteria, shared accounts are supported to simplify activities like departmental charging.

**Alarm Management:** Automate your first line of defense with CS Action & Response Management™. Use the solution to lock doors, activate alarm functions, and even email or call officers on duty without waiting for operator intervention. Set your predetermined action plans and watch response rates improve!

**Entitlement Tracking:** CS Entitlements™ permits supervision of ticketing, voting privileges, advanced transaction rules processing, special program admittance, and more.

**Online Account Management:** CS Gold is fully integrated with CBORD's ManageMyID® and NetCardManager® solutions for online deposits, transaction histories, lost card reporting, and more. Plus, CS Gold WebCard Center® supports laundry management, sports ticket lotteries, and online photo upload.

**Online Administration:** CS Gold AdminWeb is a web-based module that improves accessibility for users without CS Gold installed on their workstations. Designed to significantly reduce GUI requirements, the online module supports nightly/ad hoc reports, patron lookups, and access assignments.

**Off-Campus Commerce:** CBORD Off-Campus Commerce programs improve student satisfaction, drive university revenue, and integrate seamlessly with CS Gold.

**System Administration and Security** System and information security is of the utmost importance when dealing with personal and financial information. Distributed administration, privilege settings, and more are available using a convenient access point. User-defined security group membership enables administrators to restrict access to fields, functions, menus, and reports depending on the logged-in user. Plus, 24/7 availability means there is no downtime for nightly processing or backups.

Should problems arise, CS Gold offers five layers of transaction protection: RAID configuration, Oracle redo and automatic recovery, online backup, tape backup, and transaction process server (TPS) transaction logs. Furthermore, Oracle's Data Guard™ is a popular high-availability solution for disaster recovery planning. All of these enable administrators and the service team to recover information or troubleshoot system anomalies, ensuring transactions are protected.

## Comprehensive Solutions

CBORD provides campus card systems, integrated security solutions, housing management, food and nutrition management, catering solutions, and off-campus programs to more than 6,000 organizations. Our focus is on comprehensive solutions that increase revenue, reduce costs, enhance campus safety, improve student satisfaction, and integrate systems seamlessly.

## Innovative Products

Our innovation is customer driven. Working in partnership with users, we listen to the industry's evolving needs and develop solutions to keep you a step ahead.

## Dedicated Service

The quality of our products is made greater by the caliber of our employees. Through open dialogue with you, our customers, CBORD strives to not only meet, but exceed your expectations; we are committed to providing superior service in all aspects of our customer relationships. You can reach us twenty-four hours a day, seven days a week, and know you have a team dedicated to your satisfaction and success.
